

ART 226: Advanced Computer Imagery

Learn how to apply the tools and concepts of design software to real-world creative problems. We use Photoshop CC, Illustrator CC and InDesign CC to create advertising and promotional programs for print, web and broadcast. This course provides significant experience for transfer to a Graphic Design program beyond SUNY BCC and a logical continuation of ART 125.

Instructor: R. Harrington

This course is taught entirely online on the Blackboard platform.
