

We are
HIRING
TECH STUDENTS

When:
Tuesday, March 15th
10am to 3pm

Where:
Applied Technology Atrium

**Your career in Electrical Engineering Technology
Begins on March 15th!**

Refrigerated Transport Electronics, a worldwide leader in mobile refrigeration electronics, is hiring Electrical Engineering Technology students to fill critical roles in our Production and Remanufacturing Divisions.

Put the skills you've learned into action and start building the career you imagine.

Representatives from RTE will be available in the Applied Technology Atrium on Tuesday, March 15th, from 10 am to 3 pm to discuss opportunities where your talents are needed and help you reach your goals.

We have open positions for:

Electronics Technicians

Ensuring every product we produce functions as designed and meets some pretty rigorous standards is vital. Your job will include; programming and testing RTE-made circuit boards, troubleshooting circuit boards using schematics and working with Production Management on exciting projects.

Electronics Assembly

Electronic component fabrication, including internal wiring and assembly of various RTE electronic manufactured parts.
