WHAT IT COVERS

- The relevance of mental health to the community of military, veterans and their families.
- Risk factors and protective factors specific to the community of military, veterans and their families.
- Applying the MHFA Action Plan (ALGEE) in scenarios designed specifically for military, veterans and their families.
- National, regional and community mental health resources for service members, veterans and their families.

WHO SHOULD TAKE IT .

1[][

סנ

 Individuals who are a part of or support the military community, including service members, veterans and military families.

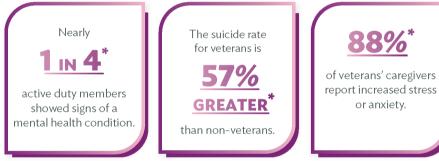

This program is supported by funding from Broome County

WHY MENTAL HEALTH FIRST AID?

Mental Health First Aid for Military, Veterans, and their Families is an evidence-based and early intervention training program developed for adults to learn how to assist and support members of their community who may be experiencing a mental health or substance use challenge.

This training specifically addresses the relevance of mental health to military culture, information on risk factors such as mental and physical trauma faced by many service members and their families, how to break down stigma and how to reach out to those who suffer in silence and are reluctant to seek help.

*the original research for the displayed statistic is linked

The course will teach you how to apply the MHFA Action Plan (ALGEE):

- Assess for risk of suicide or harm.
- Listen nonjudgmentally.
- Give reassurance and information.
- Encourage appropriate professional help.
- Encourage self-help and other support strategies.
