

# Dental Hygiene students complete community outreach

May 4, 2015

Senior dental hygiene students volunteered at the Oral Cancer Foundation's third annual Southern Tier Walk/Run for Awareness on April 26.

The Oral Cancer Foundation has recognized the efforts of the SUNY Broome Dental Hygiene Class of 2015 with the Award for Excellence in Public Service.

Community outreach participation is required for the course DEN 213W: Community Dental Health. This semester, the students also have been involved with numerous other activities. Examples include providing screenings at SUNY Broome and education sessions for the Otsego County Head Start Program, providing education for more than 1,000 children in local elementary schools, collaborating with the Healthy as a Horse Program, and participating at the SUNY Broome/BAEYC Children's Fair.
