

Music students visit the BC Center

April 13, 2015

Students in SUNY Broome's Music Theory II classes, along with Professor Heather Worden, visited the BC Center April 13 and gave a presentation on the different instruments.

Professor Worden talked about each of the music families (strings, winds, brass, percussion), and then the music students did a small performance showing how each instrument is played.

To end, the music students and BC Center children sang and played "Oh Mr. Sun" together. It was a great learning trip for the Music students, who enjoyed being part of the BC Center's celebration for Month of the Young Child.
