

Professor Sheridan-Brennan honored with Distinguished Teaching Award

May 1, 2015

The Binghamton Local Section of the American Chemical Society recognized the passion and dedication of SUNY Broome Professor Alison Sheridan-Brennan with the Distinguished Teaching Award at its annual Awards Dinner on Wednesday, April 29.

The Distinguished Teaching Award honors one teacher each year and alternates between the high school and college levels. This year's award was for college-level teaching, and faculty from Binghamton University, Hartwick College, SUNY Broome, and SUNY Oneonta were eligible for the award. Dr. Alexa Silva, Director of Instruction in BU's Chemistry Department, nominated Alison and, along with Dan Brennan, 2015 Local Section Chair, presented her with the award. The distinguished awards are the highest honor bestowed upon individuals by the section.
