

Thank you SUNY Broome from Grande Saline, Haiti

March 26, 2015

Dr. Germaine Robinson, our partner in Haiti, sent this message and asked that we share it with everyone who so generously supported the Health for Haiti project:

“Good morning! Last night I received a call from 2 of the operators, Nadège and Duckens, because I talk to them everyday about the running of the water filtration system. I was happy and can't stay without sharing my joy with you. The operators pumped water two times yesterday and around 2400 gallons had been given yesterday. People start to come everywhere in Grande Saline on foot, on bicycles, motorcycles and someone in a truck to come to pick up water and said: 'This is the water we never drink in Grande Saline before.' They are so happy. Please share our joy with everyone. Thank you so much.”

Filtered water next to original water.
